| Weighted average number of ordinary shares at the end of the period | <u>755,905,108</u> | <u>756,050,712</u> |

Note: The Company has phase I employee share ownership plan following the approval by the 19th Meeting of the Second Board of Directors, the 12th Meeting of the Second Board of Supervisors and the First Extraordinary General Meeting in 2019. In accordance with the plan, the Company purchased 2,000,000 H shares of issued shares of the Company in the secondary market and granted to 100 employees participating in the plan.

(2) Diluted earnings per share

Diluted earnings per share is calculated as dividing consolidated net profit attributable to ordinary shareholders of the Company (diluted) by the weighted average number of ordinary shares outstanding (diluted):

| Item | For the six months ended 30 June | |
|----------------------------------------------------------------------------------------|-------------------------------------|---------------------|
| | 2021 (Unaudited) | 2020 (Unaudited) |
| Consolidated net profit attributable to ordinary shareholders of the Company (diluted) | (a) <u>479,155,217</u> | <u>262,102,869</u> |

| Diluted earnings per share (RMB/share) | <u>0.63</u> | <u>0.35</u> |

(a) Consolidated net profit attributable to ordinary shareholders of the Company (diluted) is calculated as follows:

| Item | For the six months ended 30 June | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------|
| | 2021 (Unaudited) | 2020 (Unaudited) |
| Consolidated net profit attributable to ordinary shareholders (Basic earnings per share) | <u>478,723,217</u> | <u>262,102,869</u> |
| Diluted adjustments: | | |
| Forfeitable cash dividends declared to restricted shareholders in employee share ownership plan this period whose shares are expected to unlock in the future (<i>note</i>) | <u>432,000</u> | <u>–</u> |
| Consolidated net profit attributable to ordinary shareholders (diluted) | <u>479,155,217</u> | <u>262,102,869</u> |

Note: When calculating diluted earnings per share during the lock-in period of restricted shares, consolidated net profit attributable to ordinary shareholders of the Company (diluted) shall add the cash dividends (with dilution) distributed to the shareholders of the expected unlocking restricted shares in the future that have been deducted when calculating the consolidated net profit (dilution) attributable to ordinary shareholders of the Company.

(b) Weighted average number of the Company's ordinary shares (diluted) is calculated as follows:

| Item | For the six months ended 30 June | |
|-------------------------------------------------------------------------------|-------------------------------------|---------------------|
| | 2021 (Unaudited) | 2020 (Unaudited) |
| Number of issued ordinary shares at the beginning of the period | <u>755,905,108</u> | <u>756,050,712</u> |
| Diluted adjustments: | | |
| Redeemed shares for employee stock ownership scheme | 1,374,466 | 354,396 |
| Weighted average number of ordinary shares at the end of the period (diluted) | <u>757,279,574</u> | <u>756,405,108</u> |

9. SEGMENT REPORTING

The Group has identified a total of two reporting divisions, namely, optical fibre and optical fibre preform and optical fibre cable, based on internal organizational structure, management requirements and internal reporting system. Each reporting segment is a separate business segment that provides different products. The management of the Group will regularly review the financial information of different segments to decide on the allocation of resources and performance evaluation.

- Optical fibre and optical fibre preform segment – It is primarily engaged in the production and sales of optical fibre and optical preform.
- Optical fibre cable segment – It is primarily engaged in the production and sales of optical fibre cable.

(1) Information on profit or loss and asset of the segment

In order to evaluate the performance of each segment and allocate resources to them, the management of the Group will periodically review the assets, income, expenses and operating results attributable to each segment. The basis for the preparation of such information is as follows:

Segment assets include all tangible assets, other non-current assets and current assets attributable to each segment, including receivables but excluding deferred tax assets, long-term equity investments, intangible assets and other unallocated assets.

Segment operating results refer to external transaction revenue generated by each segment, deducted by the costs of sales incurred by each segment. The Group did not allocate other expenses such as sales and administrative expenses, financial expenses and other expenses to each segment.

The information disclosed in each of the reporting segments of the Group below is generated by the management of the Group, which used the following information to measure profit/(loss), assets of the reporting segments, or without providing the following information, which is regularly provided to the management of the Group:

10. BILLS RECEIVABLE

(1) Bills receivable by category

| Type | 30 June 2021 (Unaudited) | 31 December 2020 (Audited) |
|-----------------------------|--------------------------------|----------------------------------|
| Bank acceptance bills | 176,012,744 | 126,397,295 |
| Commercial acceptance bills | 124,921,175 | 148,025,423 |
| Total | <u>300,933,919</u> | <u>274,422,718</u> |

The aforementioned bills receivable are due within one year.

(2) Outstanding endorsed or discounted bills that have not matured at the end of the period

| Type | Amount derecognized at 30 June 2021 (Unaudited) | Amount not yet derecognized at 30 June 2021 (Unaudited) |
|-----------------------------|-------------------------------------------------------------|------------------------------------------------------------------------|
| Bank acceptance bills | – | 17,432,564 |
| Commercial acceptance bills | – | 5,964,628 |

As at 30 June 2021, the Group continued to recognize discounted bills and endorsed bills of RMB4,615,555 and RMB18,781,637 respectively (31 December 2020: RMB2,614,000 and RMB21,088,123). With respect to this portion of discounted bills or endorsed bills, the Board believed that the Group still retains virtually all its risks and rewards, including the risk of default on discounted and endorsed bills. Therefore, the Group continued to fully recognised this portion of the discounted and endorsed instruments. The bills, at the same time, confirmed the related payment due to the bank borrowings generated by discounting and the settlement of the the endorsed bills. After discounts and endorsements were transferred, the Group no longer retained any right to use discounted and endorsed bills, including the sale, transfer or pledge of discounted and endorsed bills to the third party. As at 30 June 2021, the carrying amounts of the bills settled by the discounted and endorsed bills that continue to be recognized were RMB4,615,555 and RMB18,781,637 respectively (31 December 2020: RMB2,614,000 and RMB21,088,123). The Board believed that there is no significant difference in the fair value of the transferred assets and related liabilities.

- (a) Reasons for making doubtful debts provisions with single accounts receivable in 2021:

In the event of default by a customer, the Group makes doubtful debts provisions with single accounts receivable in respect of that customer group

- (b) Standard and explanation of making doubtful debts provisions by group in 2021

According to the historical experience of the Company, there are differences in the losses of different segmented customer groups. Therefore, the Group divided our customers into the following groups:

- Group 1: Related parties;
- Group 2: Operators under China Telecom network and other companies with good credit records;
- Group 3: Other customers outside of the above groups.

- (c) Expected credit loss assessment for accounts receivable:

The management measures loss allowances for accounts receivable at an amount equal to lifetime expected credit loss, which is calculated using a provision matrix. As the Group's historical credit loss experience indicates different loss patterns for different customer segments, the loss allowance based on past due status is further distinguished between the group's different customer bases.

| Addition during the reporting period | 52,325,693 | 79,814,508 |
| Recoveries during the reporting period | (4,113,573) | (2,977,211) |
| Written-off during the reporting period | (3,839,913) | (7,140,079) |
| Other changes during the reporting period | 2,545,815 | 2,322,568 |
| Balance at the end of the reporting period | <u>231,864,482</u> | <u>184,946,460</u> |

- (a) At the end of each reporting period/year, the Group assesses and calculates the balance of allowance for doubtful debt according to the accounting policies and accounting estimates of the Group's allowance for doubtful debts for accounts receivable. The impairment amount were accrued or reversed after comparing with the balance of allowance for doubtful debts of the previous fiscal year.

During the reporting period, the Group did not have significant recoveries or reversals for accounts receivable that had been fully impaired or provided with a relatively large proportion of allowance for doubtful debts collected or reversed.

- (b) During the reporting period, the Group did not write-off accounts receivable with significant individual amount.

(5) Five largest accounts receivable, by debtors at the end of the period/year

As at 30 June 2021 and 31 December 2020, the subtotal of five largest accounts receivable of the Group is RMB1,722,856,975 and RMB1,502,391,507 respectively, representing 34% and 38% of the total balance of accounts receivable, respectively. The corresponding allowance for doubtful debt is RMB58,738,933 and RMB49,269,723, respectively.

12. RECEIVABLES UNDER FINANCING

| Item | 30 June 2021 (Unaudited) | 31 December 2020 (Audited) |
|----------------------------------------------------------------------------|-----------------------------------------|----------------------------------|
| Bills receivable measured at fair value through other comprehensive income | <u>179,999,207</u> | <u>138,133,247</u> |
| Total | <u>179,999,207</u> | <u>138,133,247</u> |

There is no change in fair value of receivables under financing of the Group in 2021. The accumulated impairment losses recognized in other comprehensive income is nil.

Bills receivable endorsed or discounted at the end of the period and undue at the balance sheet date:

| Item | Amount derecognized at 30 June 2021 (Unaudited) | Amount not yet derecognized at 30 June 2021 (Unaudited) |
|-----------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Bank acceptance bills | <u>46,066,699</u> | <u>–</u> |

During the reporting period, the Group discounted certain bank bills receivable from certain banks in China or endorsed them to the Group's suppliers ("**Derecognized Bills**") and derecognized them on 30 June 2021. The carrying amounts of undue bills receivable that have been discounted and derecognized on 30 June 2021 are nil (31 December 2020: RMB66,417,852). As at 30 June 2021, the carrying amounts of undue bills receivable that have been endorsed and derecognized are RMB46,066,699 (31 December 2020: RMB221,524,693). As at 30 June 2021, the remaining period of the derecognized bills was 1 to 6 months.

According to the Bill Law of the People's Republic of China, if the acceptance bank of bills receivable that is discounted or endorsed by the Group refuses to pay, the holder has recourse to the Group. The Board believed that for the endorsed bills that were derecognized, the Group had substantially transferred almost all the risks and rewards of the bills. Therefore, the Group had derecognized these bills in full.

Due to the recourse rights of the bearer, the Group continued to be involved in the derecognition of the bills and the continued exposure to the maximum risk exposure resulting in the loss of the Group amounted to its full amount.

MANAGEMENT DISCUSSION AND ANALYSIS

Overview

During the first half of 2021, the Group's operating revenue reached approximately RMB4,351.7 million, increased by approximately 27.7% as compared to the same period of 2020 of approximately RMB3,406.8 million. The Group reported a gross profit of approximately RMB1,011.3 million, increased by approximately 18.9% as compared to the same period of 2020 of approximately RMB850.4 million. The Group's profit for the Period attributable to the equity shareholders of the Company amounted to approximately RMB479.2 million, increased by approximately 82.5% as compared to the same period of 2020 of approximately RMB262.6 million. The Group's profit for the Period (exclusive of non-operating profit) attributable to the equity shareholders of the Company amounted to approximately RMB160.8 million, decreased by approximately 34.2% as compared to the same period of 2020 of approximately RMB244.4 million.

Basic earnings per share was RMB0.63 per share (for the six months ended 30 June 2020: RMB0.35 per share), which was calculated based on the weighted average number of shares issued, further details of which are set out in note 8 to the financial information as set out in this announcement.

Revenue

The Group's revenue for the Period was approximately RMB4,351.7 million, representing an increase of approximately 27.7% as compared to the same period of 2020 of approximately RMB3,406.8 million.

By product segment, a total revenue of approximately RMB1,347.5 million was contributed from our optical fibre preform and optical fibre segment, representing an increase of 9.1% as compared to the same period of 2020 of approximately RM1,235.4 million and accounting for 31.0% of the Group's revenue; while a total revenue of RMB1,868.1 million was contributed by our optical fibre cable segment, representing an increase of 30.2% as compared to the same period of 2020 of approximately RMB1,435.3 million and accounting for 42.9% of the Group's revenue.

A total revenue of approximately RMB1,136.2 million was contributed by other products and services, representing an increase of 54.3% as compared to the same period of 2020 of approximately RMB736.1 million and accounting for 26.1% of the Group's revenue. The increase was mainly due to the substantial increase in revenue of approximately RMB358.2 million in optical modules, domestic and foreign communication network engineering projects, and integrated wiring business as compared to the same period last year.

By geographical segment, a total revenue of approximately RMB2,924.1 million was contributed by domestic customers, representing an increase of 16.4% as compared to the same period of 2020 of approximately RMB2,511.4 million and accounting for 67.2% of the Group's revenue. For overseas market, a total revenue of approximately RMB1,427.6 million was reported in the first half of 2021, representing an increase of 59.4% as compared to the same period of 2020 of approximately RMB895.4 million and accounting for approximately 32.8% of the Group's revenue.

Cost of sales

The Group's cost of sales for the Period was approximately RMB3,340.4 million, representing an increase of 30.7% as compared to the same period of 2020 of approximately RMB2,556.3 million and accounting for 76.8% of the Group's revenue. The increase in cost of sales was generally consistent with the increase of the Group's revenue.

The Group's cost of sales included (i) raw material costs; (ii) manufacturing overheads (including depreciation on machinery and equipment, consumables, rental expenses, utilities and other manufacturing overheads); and (iii) direct labour costs.

For the Period, the Group's total raw material costs was approximately RMB2,798.0 million, representing an increase of 37.1% as compared to approximately RMB2,040.4 million during the first half of 2020.

For the Period, the Group's manufacturing overheads and direct labour costs amounted to approximately RMB538.3 million, representing an increase of 5.8% as compared to RMB509.0 million during the first half of 2020.

Gross profit and gross profit margin

For the Period, the Group reported a gross profit of approximately RMB1,011.3 million, representing an increase of 18.9% as compared to approximately RMB850.4 million during the first half of 2020 and the gross profit margin was 23.2% in the first half of 2021 (the first half of 2020: 25.0%). The decrease in gross profit margin was mainly because the market prices following the central bidding by China Mobile imposed pressure on the profitability of the industry.

Selling expenses

The Group's selling expenses for the Period were approximately RMB248.1 million, representing an increase of 86.1% as compared to approximately RMB133.3 million during the first half of 2020. The increase was mainly due to the substantial increase of 59.4% in overseas operating income, which resulted in a significant increase in sales freight compared to the same period last year, and the impact of the COVID-19 epidemic and travel restriction caused travel expenses and hospitality expenses in the same period of last year to be lower than normal.

Administrative expenses

The Group's administrative expenses for the Period were approximately RMB285.1 million, representing an increase of 54.8% as compared to approximately RMB184.2 million during the first half of 2020. The increase was mainly due to the increase in salary expenditures in this period compared to the previous period, as well as the lower than normal levels of professional service expenses, travel and entertainment expenses in the same period last year due to the impact of the COVID-19 epidemic and travel restriction.

Research and development ("R&D") expenses

The Group's R&D expenses for the Period were approximately RMB200.8 million, representing an increase of 26.2% as compared to approximately RMB159.2 million during the first half of 2020. The increase was mainly due to the impact of the COVID-19 epidemic, which led to lower than normal R&D investment in the same period last year.

Financial expenses

The Group's financial expenses for the Period were approximately RMB47.0 million, basically the same as approximately RMB46.2 million during the first half of 2020.

The interest rates of the bank loans for the Period ranged from 0.55% to 4.10% per annum (For the six months ended 30 June 2020: 0.86% to 5.22% per annum).

Other income

The Group's other income for the Period was approximately RMB29.0 million, representing an increase of approximately RMB7.7 million as compared to the same period of 2020 of approximately RMB21.3 million in 2020, which was mainly because the government grants related to income increased by approximately RMB5.1 million, and government grants related to assets increased by approximately RMB2.6 million.

Gains from changes in fair value

The Group's gains from changes in fair value for the Period was approximately RMB321.1 million, representing an increase of approximately RMB0.1 million as compared to the same period of 2020 of approximately RMB321.0 million, which was mainly because the Company invested in Hangzhou Semiconductor Wafer Co., Ltd. (杭州中欣晶圓半導體股份有限公司) and the fair value of these shares increased.

Income tax

The Group's income tax for the Period was approximately RMB30.8 million, representing an increase of 164.3% as compared to approximately RMB11.6 million during the first half of 2020. On the other hand, the effective tax rate increased from 4.2% in the first half of 2020 to 6.0% in the first half of 2021. Details of the preferential tax treatments of the Company and certain subsidiaries were set out in note 7 to the financial information contained in this announcement.

Capital expenditures

During the Period, the Group incurred capital expenditures of approximately RMB393.3 million (the first half of 2020: RMB144.4 million) in total, involving the purchase of fixed assets, construction-in-progress, intangible assets, which were mainly related to the production capacity expansion in China and overseas, as well as the improved production efficiency of existing optical fibre preforms and optical fibre equipment.

Gearing ratio

The Group monitors its leverage using gearing ratio, which is net debts divided by total equity. Net debts include all bank loans less cash and cash equivalents. The Group's gearing ratio as at 30 June 2021 was 13.8% (31 December 2020: 9.4%)

Cash flow analysis

The following table sets forth the selected cash flow data derived from the consolidated cash flow statement for the six months ended 30 June 2021.

| | For the six months ended 30 June | |

OUTLOOK

Since the second half of 2018, the optical fibre and cable industry has entered into a period of adjustment. Declining demand from telecommunication operators and increasing production capacity from previous expansion had an adverse impact on the demand and supply relationship of the industry, which resulted in the gradual drop of the average unit price of optical fibres and cables at home and abroad. At the same time, the rapid decrease in unit price put significant pressure on the profitability of the sector as the manufacturing cost was relatively constant. In response to the adjustment in the industry, the Company consolidated the international leading position of its principal businesses in terms of technology development and costs efficiency. It also made breakthroughs in diversification and internationalisation. Currently, China is accelerating the construction of the “double gigabit” telecommunication networks led by the 5G and gigabit optical networks. Regarding the overseas market, telecommunication infrastructure is becoming more important and the demand for optical fibre network construction is rising more quickly. Given that the domestic and overseas demand for the industry holds up well and rebounds, the Company is expected to achieve sustainable growth in the long run.

1. Demand Recovery and extreme price pressure

In the first half of 2021, the construction of mobile and fixed networks in China progressed steadily. According to the statistics published by the Ministry of Industry and Information Technology in August 2021, the number of 5G phone terminal connections in China reached 365 million as of the end of June 2021, representing a net increase of 166 million from the end of last year. The increase in 5G penetration led to the continuous growth in telecommunication network traffic. In the first half of the year, mobile internet traffic amounted to 98.9 billion GB, up by 37.4% as compared to the same period last year. In June, the monthly average data traffic per user (DOU) of mobile internet reached 13.52GB/user/month, representing an increase of 33.4% year-on-year and up by 1.6GB/user from the end of the last year. For the fixed network, a total of 510 million users connected to the fixed internet broadband services provided by the three basic telecommunication enterprises as of the end of June, representing a net increase of 26.06 million from the end of last year. Of which, 466 million users connected to fixed internet broadband with an access speed of 100Mbps or above, accounting for 91.5% of the total number of users and representing an increase of 1.6 percentage points from the end of last year. Meanwhile, 14.23 million users connected to fixed internet broadband with an access speed of 1,000 Mbps or above, representing a net increase of 7.83 million from the end of last year and accounting for 30.1% of the net growth of users connected to fixed internet broadband during the year.

The continuous rise of network traffic supported the construction of telecommunication networks. As of the end of June, the total length of optical cables throughout China amounted to 53.52 million kilometers, representing a net increase of 1.828 million kilometers from the end of last year. This facilitated further optimisation and upgrading of the optical fibre network. In the first half of 2021, the average price remained low for the industry and corporate profitability was under immense pressure. The prevailing price limit has led to the decrease in effective production capacity and the lack of supply incentives in the industry. With the resumption of growth in demand, the industry is experiencing a shortage of supply for optical fibres and the demand and supply structure is improving.

2. Improvement of production efficiency and optimisation of product structure

The Company improved the manufacturing process of fibre preforms, optical fibres and optical fibre cables on an ongoing basis, which boosted the efficiency of the supply chain and greatly reduced the manufacturing costs of common products. The Company completed the automation of the entire production process in the intelligent factories. It integrated and connected discrete process equipment and the separate workshop system with robotics and automatic logistics lines, thereby becoming the first in the industry to achieve automatic loading, unloading, transportation and logistics for the entire manufacturing process of fibre preforms. As a result, the automatic logistics system covered 100% of its main production process. The establishment of the digital supply chain for the entire process not only supported the full-cycle management of customers, products, orders and suppliers, but also created synergy in the planning of production, procurement, logistics and warehousing. This helped improve the response speed and delivery capability of the supply chain significantly. The fully digital supply chain of the Company was selected by the Ministry of Commerce to enter the list of the first batch of national demonstration cities and enterprises for supply chain innovation and applications, which highlighted the industry-leading response rate and stability of the supply chain system of the Company.

Meanwhile, the Company increased the share of high-end and customised products in its sales to strengthen its leading position in the niche markets. For the operator market, the Company enhanced the marketing efforts for its G.657.A2 and G.654.E products. As for the non-operator market, the optical fibre products, intelligent industrial control solutions and relevant products and services of the Company were applied by State Grid in its projects. In particular, the Shaanbei-Hubei $\pm 800\text{kV}$ ultra-high voltage direct current project of State Grid adopted the FarBand[®] ultra-strong and ultra-low loss G.654.E optical fibre, which achieved a breakthrough in long-distance transmission without repeaters by reaching a single-span transmission length of 467 kilometers. The high-end multi-mode optical fibres of the Company were widely used in large data centers in China and overseas. Its specialty optical fibre products for aviation, mining, healthcare and industrial lasers also made encouraging progress in the respective niche markets.

Despite the extreme price pressure, the above measures boosted the competitiveness and profitability of the principal businesses of the Company. In the first half of 2021, the average unit price of common optical fibre and cable products in the national central bidding decreased by approximately 30% as compared to the same period last year. Nonetheless, the gross profit margin of the Company reached 23.2% during the reporting period and remained stable as compared to 25.0% for the same period last year. Given the steady operating results of the Company, China Lianhe Credit Rating Co., Ltd. (聯合資信評估股份有限公司) and China Chengxin International Credit Rating Company Limited (中誠信國際信用評級有限責任公司) issued a long-term corporate credit rating of AAA and a stable outlook for the Company in May 2021, respectively.

3. Continuous business diversification

The year 2021 marks the beginning of the “14th Five-Year Plan”. Apart from the 5G network, the industrial internet, artificial intelligence and big data center sectors are also developing rapidly. According to the “Three-Year Action Plan for the Development of the New Type of Data Centers (2021-2023)” (新型數據中心發展三年行動計劃(2021-2023年)) issued by the Ministry of Industry and Information Technology in July 2021, China will establish a preliminary development pattern for the new type of data centers with reasonable planning, advanced technology, green and low carbon design and a computational capacity that is commensurate with the growth of the digital economy in three years’ time. Its target is to maintain the annual average growth rate of the number of racks for China’s data centers at around 20% and increase the average utilisation rate to above 60% by the end of 2023.

While strengthening the leading edge of traditional products, the Company put in substantial efforts to business diversification. For the optical module and transceiver business, Sunstar Communication Technology Company Limited (四川光恒通信技術有限公司), which was acquired by the Company in early 2020, continued to explore the data center market and seized opportunities in the procurement of optical modules by telecommunication operators. In the first half of 2021, it recorded an operating revenue of RMB333.3 million, representing an increase of approximately 42.9% as compared to the same period last year. Besides, Everpro Connectivity (Shenzhen) Technology Company Limited, which is a subsidiary of the Company, offered products and solutions that were widely applied in various fields, including data center, ultrahigh definition video, virtual reality, healthcare system and machine vision, thereby entering into the supply chain of large and well-known overseas customers.

4. Thorough implementation of internationalisation strategy

In the first half of 2021, the easing of certain pandemic prevention and control measures overseas and the increasing investment in telecommunication network infrastructure in various countries fuelled the growing demand for optical fibres and optical cables abroad. In a report published by CRU in July 2021, it was estimated that the global demand for optical fibres increased by 11.1% for the first half of 2021, as compared to the same period last year. By 2025, the global demand for optical fibres will exceed 600 million fibre kilometers.

Based on the demand level and profitability of the targeted overseas markets, the Company made reasonable plans for production capacity to ensure the thorough implementation of the internationalisation strategy. In the first half of 2021, revenue from the Company's overseas business reached RMB1,427.6 million, representing a rapid growth of approximately 59.4% from the same period last year and accounting for 32.8% of the total operating revenue. The Company's telecom network engineering project in Peru completed the construction of targeted base stations, despite the severe pandemic in the country. Besides, the Company set up project teams in Indonesia and Thailand. During the reporting period, the revenue of the Company's overseas telecom network engineering projects amounted to RMB144.9 million, representing an increase of approximately 107.9% from the same period last year. In June 2021, the Company completed the acquisition of 100% equity interests in YOFC Poliron, which marked a milestone for its business development in Brazil and Latin America. The Company will further optimise the overseas planning of sales and production capacity and support industry development on a global scale.

5. Synergetic growth with the capital market

Leveraging the leading core technologies in self-developed photoelectric chips and specialty optical fibres for consumers, as well as the complete industry chain and mass delivery capability for AOC products, Everpro Connectivity (Shenzhen) Technology Company Limited completed the A round financing with institutional investors including KQ Capital (昆橋基金) in the first quarter of 2021. In the first half of 2021, the fair value of shares invested by the Company in Hangzhou Semiconductor Wafer Co., Ltd. increased by approximately RMB320.0 million. The Company will capitalise on the investment and financing channels in the capital market in a reasonable manner, so as to promote its sustainable growth in the long run.

DIVIDEND

The board of directors of the Company did not recommend any interim dividend for the Period.

PURCHASE, SALE OR REDEMPTION OF THE COMPANY'S LISTED SECURITIES

During the six months ended 30 June 2021, there were no purchase, sales or redemption of the Company's listed securities by the Company and its subsidiaries.

IMPORTANT EVENTS AFTER THE REPORTING PERIOD
